

# Aditya Sanjay Wagh

Java Developer | Backend Developer | SQL & Database Enthusiast

Pune, Maharashtra, India | +91-9021645439 | [aditya.wagh0211@gmail.com](mailto:aditya.wagh0211@gmail.com) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

## SUMMARY

Final-year B.Tech Computer Science (Cyber Security) student at G.H. Rasoni College, Pune (CGPA: 8.43/10). Proficient in Java, Python, SQL, MySQL, JDBC, REST APIs, OOP, and Linux with 4 major academic projects and 100+ LeetCode problems solved. Currently learning Spring Boot, Hibernate/JPA, LangChain, LangGraph, and Agentic AI application development to build scalable backend and AI-powered systems.

## TECHNICAL SKILLS

**Languages:** Java, Python, SQL

**Databases:** MySQL, JDBC, Database Design, Schema Design, DBMS

**Concepts:** OOP, Data Structures & Algorithms, REST APIs, Debugging, Problem Solving, Software Troubleshooting

**Tools:** Git, GitHub, Linux CLI, Maven, VS Code, IntelliJ IDEA

## INTERNSHIP EXPERIENCE

**Intern**

Dec 2025 – Jun 2026

[GlobalTech Infinity Systems](#)

Pune Corporate Office

- Participated in internship training and completed technical assignments related to cyber security and software development practices.
- Gained exposure to database fundamentals, software documentation, debugging, and troubleshooting techniques.
- Prepared technical reports and collaborated with team members on assigned deliverables and industry workflows.

## PROJECTS

**Smart Attendance System** – Python, OpenCV, MySQL

[GitHub](#)

- Built a face-recognition-based attendance system automating attendance tracking for 100+ users using OpenCV and MySQL.
- Integrated real-time face detection with a normalized database schema for efficient attendance management and retrieval.

**Hotel Management System** – Java, JDBC, MySQL

[GitHub](#)

- Developed a desktop application for room booking, billing, and customer record management using Java and MySQL.
- Applied OOP principles including encapsulation, inheritance, and abstraction to create modular and maintainable code.

**Smart Surveillance System** – Python, YOLOv5, OpenCV

[GitHub](#)

- Developed a real-time object detection system using YOLOv5 and OpenCV for surveillance video analysis.
- Optimized detection performance for low-latency processing and continuous monitoring applications.

**Job Portal / HRMS Project** – Java, SQL, MySQL

[GitHub](#)

- Developed an HRMS supporting employee management, job postings, application tracking, and database-driven record management.
- Designed relational database structures and implemented CRUD operations for efficient data management.

## EDUCATION

**B.Tech in Computer Science (Cyber Security)**

**CGPA: 8.43 / 10**

G.H. Rasoni College of Engineering and Management, Pune

2022 – 2026

**Higher Secondary Certificate (HSC)**

61.50% – 2022

**Secondary School Certificate (SSC)**

80.80% – 2020

## LEARNING & EXPLORING

Spring Boot · Hibernate/JPA · Spring Security · LangChain · LangGraph · Agentic AI · RAG Applications · Docker

## CERTIFICATIONS & ACHIEVEMENTS

- Deepening ABAP Programming Knowledge** — SAP Certification
- Basic ABAP Programming** — SAP Certification
- Web Development Fundamentals** — IBM Certification
- 110+ LeetCode Problems Solved**
